

Testing effects is verifying actions

EFFECTS TEST

```
it('should return a success action on login', () => {  
  actions$ = new ReplaySubject(1);  
  actions$.next(new Login(credentials));  
  
  const action = new AuthSuccess({ user });  
  
  // mock auth service mock response  
  
  login$.subscribe(result => expect(result).toBe(action));  
});
```
